SKILLS+ 3.0 PROJECT

SHOWCASING SKILLS AND BOOSTING EMPLOYABILITY FOR PEOPLE WITH A LABOUR DISABILITY THROUGH NATIONAL AND EUROPEAN COMPETITIONS

**PROJECT NO. 2023-1-NL01-KA220-ADU-000156772**

UNLOCKING POTENTIAL:
THE PROGRESS OF THE PROJECT

Since the successful launch of the *Skills+ 3.0* project, significant progress has been made in empowering individuals with labor disabilities. This innovative initiative, which aims to foster collaboration between small to medium enterprises (SMEs) and people with labor disabilities, continues to promote capacity building and alternative pathways to employment.

NATIONAL COMPETITIONS UNDERWAY

The heart of the project lies in the National Competitions hosted by each partner country. The eight (8) consortium members have already started organizing the upcoming events which will take place all over Europe and will serve as a gateway to the much-anticipated European Competition.

By the first months of 2025, a series of Focus Groups will be delivered in each national context, aiming to familiarize interested SMEs, Sheltered Workshops and potential participants with the concept and the implementation of the competitions.

THE DIGITAL MANUAL

A useful and comprehensive document has been developed on behalf of the *Skills + 3.0* project partnership, addressed to Sheltered Workshops and job coaches/buddies on **why and how to participate to the *Skills+* competitions**. This document serves as a **practical guide**, offering a detailed analysis on the background and how to participate in the relevant competitions.

In order to ensure that this Digital Manual is in alignment with the needs of both the participating individuals and employers, the main aim of the Focus Groups will be the evaluation of this document.

These inclusive guidelines, developed in eight (8) chapters, will be soon available in all eight (8) partner - languages.

Stay tuned and join us in this exciting journey towards shaping an inclusive society!🚀
